

Tradition and Market Presence

For the past 30 years, Montele Elevadores has established a leading role in sales, manufacturing, and service operations for Brazil's accessibility market.

We have installed over ten thousand elevators and platform lifts and reached the mark of one thousand units a year for the past three years.

We are well regarded by industry thought leaders like PINI and Arco and have a long history of recognized excellence with lifts in famous buildings, such as the Niemeyer's projects in Brasilia, the top 5 banks and thousands of other premium locations.

Montele has conducted large scale accessibility projects with national and international giants such as Banco Itaú, McDonalds and Wal-Mart.

Accessibility Pioneer

Montele Elevadores was the first company to develop and manufacture a platform lift in Brazil.

We based our unique design on ANSI and ISO standards.

Always innovating, we also build to the newest Brazilian standards (NBR-ABNT).

At Montele, safety and technology is paramount. We proudly employ over 250 people, including a team of more than 20 engineers that focuses on both factory and field operations.
